

frequent sinkholes, especially the central part of the state. Many sinkholes are also found in Northern Michigan, in some parts of the state you can find up to five deep sinkholes within two miles of each other and also found underwater. Sinkholes are found throughout the world and not limited to the Picture courtesy of Picture courtesy of GUATEMALA CITY, Guatemala, February 2007 - A 330-foot-deep sinkhole killed three people, swallowed about a dozen homes, and forced the evacuation of nearly 1,000 people in a crowded Guatemala City neighborhood. Officials blamed the sinkhole on recent rains and an underground sewage flow from a ruptured main.
