Charcot-Marie-Tooth disease type 2

Other Names for this Disease

- Charcot Marie Tooth disease type 2
- Charcot-Marie-Tooth disease, axonal, Type 2
- CMT 2
- Hereditary motor and sensory neuropathy 2
- HMSN 2

Charcot-Marie-Tooth disease type 2 (CMT2) is a very rare form of CMT. Individuals with this condition may have diaphragm or vocal cord paresis in addition to the other problems associated with CMT. Mild sensory loss has also been noted in some individuals. CMT type 2 is caused by mutations in the TRPV4 gene on chromosome 12q24.
